

AMENDMENTS TO THE SPECIFICATION

Please add the following new paragraph after paragraph [0016] of the published application US 2005/0116935.

[0016.1] **FIG. 5 and 5A** are top and side view of a wheel on a mousing device in accordance with an embodiment of the present invention.

Please add the following new paragraph after paragraph [0042] of the published application US 2005/0116935.

[0042.1] **FIG. 5** depicts an example of a mousing device 500 used in accordance with an embodiment of the present invention. The mousing device 500 may be wireless or connected to the user interface 140 via a wire. The mousing device may include a wheel 520, a right button 530 and a left button 540, and a housing 510. The mousing device may also include a transceiver (not shown).

[0042.2] The mousing device 500 with wheel 520 may be used to send commands to an imaging system via a transmitter (not shown) and or a receiver (not shown). Movement of wheel 520 may translate to a command to a diagnostic imaging system. Additional receptors may include buttons, 530, 540 to trigger additional functions. A processor may convert motion of the wheel 520 into commands to a diagnostic imaging system. Depressing the buttons 530,540 may also output commands to an imaging system or the like.
